MEMORANDUM FOR: Assistant Director/Scientific Intelligence

SUBJECT: Coordination with DD/I

25X1A 1. OCI has just produced an appraisal of the significance of Khrushchev's remarks on abandoning the lunar race. They did so with substantial help from [ ] but without contacting Carl Duckett or myself. In fact, I did not even see a copy of the memorandum before -- in spite of the fact that the Director had specifically given this job to Sherman Kent and myself.

25X1A 2. I raised this with Cline yesterday morning in the strongest possible terms and told him this would have to stop. Mr. Cline complained that the time limit was short and that he expected supporting help from the offices, and expected OSI to notify me if it was of interest to me. I also said this was unacceptable. I told him that we could no longer tolerate OCI raiding parties contacting their favorite analysts in OSI and by-passing the line of command, which is responsible for the substance of these contributions. Cline argued that there should be a responsible individual in OSI to whom they could come and inquired about [ ] status. I indicated that [ ] was not yet available and, until such an arrangement was made, Cline should direct his people to contact the Assistant Director for Scientific Intelligence in all cases. 25X1A

3. I want you to let everyone in OSI know that they are not to take assignment unless you personally,

**SUBJECT: Coordination with DD/I**

or your designated officer, are in the loop and have control of the problem. I believe only in this way can we cauterize the free-wheeling tendencies of the DDI action types.

25X1A

**ALBERT D. WHEELON**  
Deputy Director  
(Science and Technology)
